Here is an amazing and rare opportunity to purchase 234 acres of certified organic farm ground. This parcel is offered as one parcel or may be split into separate Tracts!!

Owner is currently farming the 160 acres tract which includes all of the bottom ground with cover crops and organic soybeans. The current owner states that he is currently farming approximately 135 acres in this tract. This tract is made up almost entirely of bottom ground. The only exception is 9 acres in the Southwest Corner. The owner would sell this tract separately for \$992,000.

The 74 acre of hill ground is also certified organic and currently in hay production. The hill sides were previously farmed to kill out the Fescue and replanted to Brome hay. This tract could be utilized as is or converted back to farmland. It would make a great place to build a house or houses with great views. This tract is also for sale individually for \$333,000.

This is an amazing area for wildlife well know for Big Whitetails, and Wild Turkey's. This could bring in around \$3000 in additional income for a hunting lease.

More Pics and Drone Footage coming soon.

For more information call, text, or email Jeff Quinn 1-660-734-3925

Taxes: \$787.91
